Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 9,10,11,12,13,14,16,17 & 18 are rejected under 35 U.S.C. 103(a) as being unpatentable over Thomas (5,672,101) in view of Anderson (3,738,621). Thomas discloses a solar operated vent cover comprising: a vehicle (20) , a roof (21), solar cells (166A-166B), fans (200A-200B) which maybe inherently axial or radial situated, ventilator cover (130) that are solar operated and extends lengthwise, and with respect to claim 12, the air flow is directed towards the front (see figure). Thomas disclosed invention lacks a thermoelectric/peltier cooling device powered by solar cells. Howard (6,662,572) teaches thermoelectric coolers (26) powered by solar panel devices. It would have been obvious to one having ordinary skill in the art at the time of the invention to modify the disclosed invention of Thomas with thermoelectric solar powered panels as taught by Howard for providing electrical power to cooling device to provide efficient cooling.

Claim 15 is rejected under 35 U.S.C. 103(a) as being unpatentable over Thomas as applied to claim 1,12 above, and further in view of "Official Notice". It well known in the art to provide venting louvers that extends across a vehicle roof for increase air flow provision.

Response to Arguments

Applicant's arguments filed 11/18/2008 have been fully considered but they are not persuasive. The prior art Thomas (5,672,101) shows a rear portion (30) and a front port (35) as shown in figures.

Allowable Subject Matter

Claim 19 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
